Deploy to Azure

Visualize

This template deploys a **Linux VM Ubuntu 18.04-LTS**, informing only two parameters **adminUsername**, **adminPassword** and **vmName**. This will deploy a **Standard_DS1_v2** size VM in the resource group location and return the fully qualified domain name of the VM.

Parameters

- **adminUsername:** Usernames can be a maximum of 20 characters in length and cannot end in a period (".").
- **adminPassword:** Complex password for your Virtual Machine. For more information about use this [link](#):
- **vmName:** The name of your Virtual Machine. Keep in mind that the Virtual Machine Name is key for you to deploy multiple resources at the same group. It will come with a default value, but you can change it when deploying your resource. Also know that the maximum characters allowed are 15.

If you are new to Azure virtual machines, see:
