Azure Blockchain Service

Azure Public Test Date 2019.10.06   Azure Public Test Result PASS

Azure US Gov Test Date 2019.10.06   Azure US Gov Test Result PASS

Best Practice Check PASS   CredScan Check Not Tested

Deploy to Azure   Visualize

This template deploys a **Azure Blockchain Service**, that currently provides support for the Ethereum Quorum ledger using the IBFT consensus mechanism. It's a **Basic price tier** that provides 1 vCore CPU. The necessary parameters are:

- **blockchainMemberName:** Blockchain member name.
- **memberPassword:** Sets the managed consortium management account password.
- **location:** The GEO location of the blockchain service.
  Available locations:

```
"westeurope",
"eastus",
"southeastasia",
"westeurope",
"northeurope",
"westus2",
"japaneast"
```
